

Tuffhoze Cart and Reel Compatibility Chart

- We recommend that your Tuffhoze be fully unwound from the cart/reel before use.
- After use and before rewinding your Tuffhoze back onto the cart/reel, turn the tap off and depressurise the hose by opening the nozzle or depressing the trigger on your gun/lance. Then rewind the hose back onto the product. This will enable much of the water to be removed from the hose before storage.

Compatible

Tuffhoze can be used on the following products without the need for modification
